

Section Title:

Sustainable Development of Public Housing

Super:

For 10 years starting 2019/20

Target supply of public housing: 220,000 units

VO:

To shorten the waiting time for PRH applicants

we endeavour to meet the housing production targets

and keep enhancing the sustainability of our public housing

Super:

Total Maintenance Scheme

Estate improvement works

VO:

We proactively provide in-flat inspections and repairs

and at the same time improvement works

in the older estates are carried out to extend their life span

Super:

Promoting eco-lifestyle

VO:

Energy saving and waste reduction measures are also in place

to promote an eco-friendly lifestyle

Super:

Electric vehicles

Fabric reinforcement

Precast concrete components

VO:

We adopt low carbon construction methods

and energy saving measures in our new public housing projects

These include making massive use of pre-cast components

avoiding plastering and tiling on walls

(June 2019)

Super:

Green treatment of marine mud

Solar power water heaters

VO:

and using recycled materials

and renewable energy whenever possible
