

Safe Use of Escalators

Voice over:

No one wishes to see these accidents
so we must abide by the safety rules
when using escalators
When using the escalator
take good care of children and the elderly
Stand properly and hold the handrail
Do not walk or run up and down the steps
Do not sit on the handrail
Do not stand too close to the escalator's edge
If you're wearing open-toe footwear
please take extra care to keep your distance
Do not carry too many things or bulky items
If necessary, you should take the lift
Those with a pram should also take the lift
If you have to use the escalator
take the baby in your arms
and fold the pram before taking the escalator
Remember, if you're pushing
a wheelchair or trolley
you cannot take the escalator
People with needs had better use the lift

Super:

Remember the safety rules

Use the escalators properly

Voice over:

If everyone remembers these rules

we can use the escalators safely
