

THE HONG KONG HOUSING AUTHORITY

Memorandum for the Building Committee

Conversion of Surplus 3-Bedroom Flats to Small Flats in Standard Harmony Blocks

PURPOSE

This paper is to seek Members' endorsement to the conversion of surplus 3-Bedroom flats in Harmony block building contracts, the adjustment of the Project Budgets and a new option 7 of the New Harmony 1 block.

BACKGROUND

2. The Strategic Planning Committee (SPC) approved the proposal to convert surplus 3 Bedroom flats due for completion up to 2003/04 on 16 September 1999 by way of Paper No. SPC 37/99.
3. The Building Committee (BC) approved four design proposals for the conversion of surplus 3-Bedroom flats in Harmony 1, Harmony 3 and New Harmony 1 blocks on 21 October 1999 by way of Paper No. BC 168/99. The projects affected, the details of the costs and effects on the project budgets were to be the subject of a separate submission.

CONVERSION SCHEMES

4. Subsequent to Members' approval of the four conversion schemes, two of the schemes have been revised for the better use of space and the more effective furniture layout as shown at **Annex 1** and as follows -

(a) **Scheme 1 (revised)**

Design for the conversion of the 3-Bedroom flat at the end bay of Harmony 1 / Option 5 to small flats is revised for a more effective use of space.

(b) **Schemes 2 & 3**

Conversion designs which are already standard Harmony Block arrangements remain unchanged as approved by the BC on 21 October 1999.

(c) **Scheme 4 (revised)**

It is proposed to abandon the original Scheme 4 because of unsatisfactory flat layouts. The designs were not well received at the BC and room layouts do not lend themselves to effective furniture layouts and are likely to lead to complaint.

The 3-Bedroom flat at the central core of the New Harmony 1 / Opt.1 block is to be changed to a standard 1P/2P flat and a standard 1-Bedroom flat for more efficient flat layouts.

NEW HARMONY 1 /OPT.7 DESIGN

5. The revised conversion scheme 4 for the New Harmony 1 / Opt.1 block at paragraph 4(c) above will be developed into a new option 7 design as shown at **Annex 5**. This option is a development of option 1 but with 4 no. 1P/2P flats at the central core in lieu of 3 no. The 40 no. 3-Bedroom flats in option 1 will be changed into 40 no. 1P/2P flats and 40 no. 1-Bedroom flats to enhance the supply of small flats.

6. The construction cost for this new option is as follows -

		Construction Cost (at June 99 price level) (\$)
Cost/m ² of CFA		5,345
Cost/Block		212,729,000
Cost/Flat	1P/2P Flat	157,509
	1B Flat	272,896
	2B Flat	354,331

FLAT PRODUCTION

7. The proposal endorsed by BC was to examine the feasibility of conversion of 1,600 surplus 3 bedroom flats into 2,401 small flats as a contribution towards a target production of 6,000 additional small flats by 2005/06. The balance of the target production was to be provided by adjustments to future projects by the use of suitable options of the New Harmony Blocks or the use of Annex Blocks.

8. The projects have been examined in detail and the programme and planning aspects evaluated and 10 suitable projects with 914 surplus 3-Bedroom flats in 13 Harmony blocks have been confirmed. These projects will provide an additional supply of 1,074 small flats including 914 1P/2P flats and 160 2P/3P flats. The details are shown at Annex 2.

9. The balance of production of 4,926 small flats will be provided in new projects through the use of New Harmony blocks, the use of Annex Blocks where possible and through a review of the balance between HOS and PRH projects.

COST IMPLICATIONS

10. The June 1999 Cost Yardsticks of existing types of small flats have been used as a benchmark for the costs of conversion. The costs of conversion include construction costs, abortive works, prolongation costs for estimated extensions of time to the contracts and the likely loss of rent arising out of the delays to completion. The estimated additional costs for the conversion works at June 1999 prices are shown at Annex 3. The actual costs incurred are to be assessed on a project basis.

FUNDING IMPLICATIONS

11. Adjustments to the Approved Project Budgets and Project Development Budgets will be required for the projects implementing the conversion and the details are shown at **Annex 4**. The additional capital costs are estimated to be \$183.156M over a period of four years.

TIME IMPLICATIONS

12. Extensions of time for some of the on-going projects are anticipated. Preliminary assessments have been made by the project managers against the contract programmes and are considered to be appropriate for planning purposes. The details the are shown at **Annex 2**. Supplemental Agreements to the contracts will be entered into for projects under construction where appropriate.

RECOMMENDATIONS

13. Members are recommended to -
- (a) Approve the revised conversion designs for scheme 1 and scheme 4 discussed at paragraph 4(a) & 4(c).
 - (b) Approve the New Harmony 1 Block Option 7 as described at paragraph 5.
 - (c) Approve the projects for conversion discussed at paragraph 8 and shown in **Annex 2**.
 - (d) Approve the revised Approved Project Budgets and Project Development Budgets discussed at paragraph 11 and as shown at **Annex 4**.
 - (e) Note the time implications discussed at paragraph 12.

PRESUMPTION

14. It is not thought that Members will object to the recommendations at paragraph 13 above. If no objection or request for discussion is received by the Committees' Secretary **by noon on 3 February 2000**, Members' approval will be presumed and follow-up action will be taken.
