Title: Estate Fun Journey, Sau Mau Ping South Estate

Mother Should plastic bottles go in the yellow, brown or blue one?

Daughter Brown

Mother Clever! You know a lot about waste separation

Daughter Yes, my teacher taught me to love the environment

Mother Let's go to the eco-friendly Sau Mau Ping South Estate
to learn more about protecting the environment

Daughter Okay!

Mother Let's go!

Daughter How is this estate eco-friendly, Mum?

Super Greening ratio is 40%
Over 5 000 trees
Green Building Award
Landscape Design Award
Solar-powered electricity generation

VO This estate's greening ratio is 40%

and over 5 000 trees have been planted here

Even the covered walkways are planted with greenery

There are lots of other eco-friendly facilities too

The estate even won the Green Building Award
and the Landscape Design Award

Very impressive!

Look at this solar panel over the pavilion

It uses renewable energy to generate electricity

Daughter There's a fan here, Mum!

Mother That's not a fan, silly. It's a windmill

Super Wind-powered electricity generation
Monitor showing generation output

Daughter What does the windmill do?

VO A windmill uses wind to generate power
It supplies some power to light the estate
It may not produce much power
but it makes people aware of renewable energy
and environmental protection

Mother And this monitor shows
the electricity generation output of the windmill

Daughter Let's buy a windmill like this

VO Don't be silly. It's much too big for our home!

Daughter Why are the rocks painted?

Super Secondary students artworks
Produced by artists and residents

VO Some of these beautiful rock paintings
were painted by local secondary school students
and show their ideal living environments
others were done by young artists and residents
The themes are marine life and protecting nature
These rock paintings beautify the estate
They're a major feature of this estate!
