Title: Safe Use of Escalators

VO

No one wishes to see these accidents
so we must abide by the safety rules
When using the escalator
take good care of children and the elderly
Stand properly and hold the handrail
Do not walk or run up and down the steps
Do not sit on the handrail
Do not stand too close to the escalator edge
If you're wearing open-toe footwear
please take extra care to keep your distance
Do not carry too many things or bulky items
If necessary, you should take the lift
Those with a pram should also take the lift
If you have to use the escalator
take the baby in your arms
and fold the pram before taking the escalator
Remember, if you're pushing a wheelchair or trolley
you cannot take the escalator
People with needs had better use the lift
If everyone remembers these rules
we can use the escalators safely

Super

Remember the safety rules
Use the escalator properly
