Title: ISO14001 Environmental Management System Certification (2)

Super Build Our Green Home

Son Mom, what is a green home?

Mother It's a place where everyone cherishes nature and
a greener and less polluted living environment

Son How can we have a green home?

Mother We must all work together
and start with the details in our daily living

Super Energy Conservation

VO For example, let's use less water and electricity
so as to save energy

Super Use Less Disposables

VO Use less disposables to reduce waste

Super Waste Separation and Recycling

VO Separate wastes and recycle suitable items

Super Recycle Old Clothes

VO Clothes that no longer fit can be recycled too
This can also help others in need

Super Treasure Resources

VO Most important of all, treasure resources
and reduce wastage

Mother With a safe and clean green home
we can all live happily and comfortably

Super ISO14001
Environmental Management
System Certification

VO The Housing Authority has obtained
for its estates the ISO14001 certification
for Environmental Management System, which helps
systemise its environmental management measures
for reducing resource wastage
and raise stakeholders' eco-consciousness
thus enhancing the quality of estate management
and ensuring a safe and clean living environment
Currently all estates have already obtained this certification
yielding good results

Son Let's all contribute to our green home!

Super Let's Build Our Green Home Together
