### Title: Take Good Care of Fire Service Installations

Super        Take Good Care of Fire Service Installations

Daughter    Dad?

Dad, why did you wedge open the fire door with newspapers?

It'd be a disaster if there's a fire

Hurry up and remove them

Dad         I just wanted to get some fresh air

Why, this is just a normal door like any other

Boyfriend   Uncle, there's nothing normal about this fire door

Its materials and installation need to comply with the requirements  
of the Buildings Ordinance

Not only is it fire-resistant

It'll close automatically after you push it open

Its whole design is to prevent smoke and fire from spreading to the  
staircases during a fire

This gives us time to escape

Super        Fire-resistant

Self-closing door

The intumescent seal undergoes thermal expansion

Dad         Oh, I didn't know this door was so important

Let me close it

Daughter Dad, apart from the fire door  
there are various fire service installations on every floor  
such as the fire hose reel  
When there is a fire  
we can use them properly under safe condition

Boyfriend So, we shouldn't misuse or damage these fire service installations  
They really are a matter of life and death

Dad So, if I see these things happening  
I should inform the estate office at once  
So they could deal with the matter as soon as possible

Daughter Exactly! Here's a 'Like' for you
