

Abbreviation	
BIM	Building Information Modelling
CCTV	Closed circuit television
CDM	Construction Design Management
CIC	Construction Industry Council
CICTA	Construction Industry Council Training Authority
CM	Contract Manager
COP	Code of Practice
CRC	Contractors Review Committee
DCD	Development and Construction Division
DDRP	Detailed Design Review Panel
EFQM	European Foundation for Quality Management
ELS	Excavation and lateral support
EMD	Estate Management Division
EMSD	Electrical & Mechanical Services Department
ETWB	Environment, Transport & Works Bureau (the present Development Bureau)
EU	European Union
EVA	Emergency vehicular access
GI	Ground investigation
HA	Housing Authority
HASAS	Housing Authority Safety Auditing System
HD	Housing Department
HKCA	Hong Kong Construction Association
HKCIC	Hong Kong Construction Industry Council
HKCSA	Hong Kong Construction Sub-contractors Association
HKFEMC	Hong Kong Federation of Electrical & Mechanical Contractors
HKHA	Hong Kong Housing Authority
HKPHEA	Hong Kong Professional Hoisting Engineering Association
HSE	Health, Safety & Environment
HVAC	Heating, ventilation and air conditioning
HyD	Highways Department
ISO	International Organization for Standardization
LD	Labour Department
LECA	Lifts & Escalators Contractors Association
LGCQ	Liaison Group on Construction Quality
LPG	Liquefied petroleum gas
OHSAS	Occupational Health Safety Assessment Series
OSH	Occupational Safety and Health
OSHC	Occupational Safety and Health Council
PASS	Performance Assessment Scoring System
PD	Project Director
PDRC	Project Design Review Committee
PM	Project Manager
PolyU	The Hong Kong Polytechnic University
PPE	Personal protective equipment
PTAS	Preferential Tender Award System

PtD	Prevention through Design
RCV	Refuse collection vehicle
RVD	Reversing Video Device
SE	Structural engineer
TTA	Temporary traffic arrangement
UK	United Kingdom
USA	United States of America
WFRA	Work flow risk assessment

3 EARLYs	100
4C	1, 4
4D	1, 4
4 layers of protection	31
12 C's for Team Building	1

A

Assurance	1
Additional safety audit	7
Asbestos handling	68
Australian research	10

B

Bathing facilities	59
Belief in our systems	31, 32
Benchmarking good practice	Contents, 10-29
Benchmarking safety in project planning & design	4
Benefits of getting it right the first time	12
Bicycle parking	63, 64
Building Committee	40
Building Information Modelling (BIM)	iii, 36, 38, 43-46
Building services (underground)	58
By installation control	80
By preventive design	80

C

CARE	9
Care and engagement	31, 32
Case studies	Contents, 4, 39
Cat-ladders	47-52
CDM implementation flow	33
CDM implementor	33, 35, 36
Charter	ii, iii, 1
Charting safety forward	5, 8, 9
Collapse of falsework	39

Common areas in buildings	61, 62
Common areas in buildings - Homogeneous wall tile finishes at corridors	62
Common areas in buildings - G/F entrance gateset design	62
Components of corporate score	6
Constructability	31, 32
Construction Design Management – CDM	33, 38
Construction Design and Management Process	i, 17
Continuous documentation	14
Contractor's ELS Scheme	71
Core values	4
Coverage of "Pre-tender Health and Safety Plan"	i, 21
Covered walkway	50, 53, 54, 65, 67
Crane Handling	78
Critical Pass	7

D

Demolition	Contents, iii, 4, 13, 25, 29, 67-79
Demolition plan	67
Demolition planning features	67
Design Review Process (DRP)	14
Design to constructability	31
Designers	Contents, iii, iv, 3-9, 14, 15, 19, 21, 22, 30-39, 40, 41, 86, 99
Designer for permanent works and facility management	iii, iv, 3, 5
Designer for procurement	Contents, iii, iv, 5-9
Designers for procurement of permanent works design & planning and execution of construction, renovation, maintenance, alteration & addition and demolition	iii
Designer for temporary works and works execution during construction or maintenance	iii, iv, 3, 5
Detailed Design Review Panel (DDRP)	40, 47
Double slabs design	58
Duty holder	iii, iv, 5

E

Early design	70, 100
Early management	100
Early planning	8, 67, 71, 100
EFQM	1-3
Electrical Supply Lines (Protection) Regulation	89
ELS works	70, 71
End users	Contents, 1, 4, 21, 47-66
Engineer	5, 31-33, 36, 39, 41, 67, 70, 85, 87, 90, 95, 97

Engineer's ELS Scheme at pretender stage	70
Equipment disposition and transportation	72
Example of Issues to be Addressed at Preliminary Design Stage	i, 23
Excavation and Lateral Support (ELS) Works	70
Excavation for roads and drainage works	87
Expert builder	iii, iv, 5
External areas	64, 65
External work design	53, 64-66
External work design guide	53, 64-66

F

Fabric reinforcement	76
Fast track construction	30
Fault avoidance – maintenance consideration	81
Fault avoidance – materials and equipment	80
Fault detection – early identification of fault	82
Footbridge	53, 55
Foundation	27, 30, 67-79
Full height lift landing barriers	85

G

Gas barrier	58
Gas Safety (Gas Supply) Regulations	89
Geotechnical engineering works (safety aspects in slopes and ground investigation works)	Contents, 93-96
G/F entrance door design	61
Gondolas	55, 79
Good practice of planning and design for safety	Contents, iii, 30-38
Good practices in civil engineering design	87, 90
Good practices – catchpits	87, 91
Good practices – manholes	87, 90
Good practices – pedestrian crossings	87, 92
Good practices – road gullies	87, 92
Green roof	53, 54

H

Handover stage	59
Hong Kong Construction Association (HKCA)	v, 40, 41
Hong Kong Construction Sub-contractors Association (HKCSA)	iii, v
Hong Kong Federation of Electrical & Mechanical Contractors (HKFEMC)	iii, v
Hong Kong Professional Hoisting Engineering Association (HKPHEA)	iii, v, 40
Horizontal lifeline fall arrest system	49-51
Housing Authority Safety Auditing System (HASAS)	6, 7
How can “Designer” practise safe design	iv, 4
HSE Impact Rating Scale	34

I	
Impact / probability matrix	34
Inside flats	59, 60
Inspection	1, 23, 26, 31, 32, 35, 52, 62, 93-96
Inspection chamber	52
Inspiration and commitment	30
Installation control	80, 84, 86
Installation of Reversing Video Device (RVD)	8
Integrated team approach	33

J	
July 2007 Workshop Prevention Through Design (PtD)	10

K	
Key success factors	9

L	
Labour Department (LD)	iii, v, 42
Land (Miscellaneous Provisions) Ordinance	87
Large panel formwork	76
Large size window	60
Large steel cage erection in pile cap and transfer structures	73
Large steel cage erection in raft footing for domestic blocks	73
Laundry rack	60, 61
Laundry rack design	61
Leadership	ii, 1, 3, 31, 32
Learning from incidents	5, 7
Liaison Group on Construction Quality (LGCQ)	47
Lift shaft work	86
Lifts & Escalators Contractors Association (LECA)	iii, v, 40
List management systems	51
Loading Test	73

M	
Maintenance access	47, 51, 53-55
Master details	58
Materials and plant handling	71
Materials storage	71
Maturity levels of safety management	1
Mechanized construction	76
Metal scaffolding	53, 86
Miniature CDM	Contents, 39
Mission	4
Mobile site office and toilet	95
Model Client Brief	47-66

N	
Near miss and audit	31, 32
Never safe enough	ii
Non-slip floor finishes	64

O	
Objectives of CDM Regulations	14
Occupational Safety & Health Council (OSHC)	iii, v, 17, 18, 20, 21, 23-25, 27, 40, 41, 49
Ongoing targets	9
Operation consideration – enhance awareness	84
Operation consideration – meet all users’ needs	83
Operation consideration – prevent mishap	83
Operation logistics	41

P	
Paving to pedestrian area	66
Pay for safety	7, 85, 98
Pedestrian and vehicular circulation	63
Performance Assessment Scoring Systems (PASS)	6
Performance monitoring	iv, 2, 6
Perspective from designers for procurement	Contents, 4
Perspective from designer for temporary works and works execution during construction or maintenance	Contents, 4, 30-38
Perspective from end users	4
Pictorial Guide	ii, iii, iv, v
Plan-Do-Check-Act	1, 2
Planner	33
Planning and design for safety at operation, use, management and maintenance of building services installations	Contents, 80-86
Planning and Working Safety of the Operation of Tower Crane	42
Planning & Control	1
Playground facilities	64, 65
Precast beam	77
Precast facade	77
Precast construction	76
Precast staircase	77
Preferential Tender Award System (PTAS)	5, 6
Prevention is better than cure	iv, 1, 97
Prevention through design	10-13
Principles of hazard management	iv
Probability rating scale	34
Process management	1, 2, 97
Procurement cycle	5, 40
Procurement management	2, 5
Proforma for “Hazard and Impact Summary”	i, 20

Proforma for "Summary of Health and Safety Concerns"	i, 18
Project Design Review Committee (PDRC)	47
Project development & delivery	1, 2
Project management	iv, 3
Project Portfolio Management Software Tool	37
Project programme	2
Project risk register	33, 35
Protection from falling objects	54, 65
Protection guard	96
Provision	Contents, 1, 12, 26, 39, 47-68, 80-82, 85, 87, 93-96
Provision for future installation of gondola	56
Provision for future installation of gondola parapet design	56
Provisions for the visually impaired	66
Provisions of fixing gondolas	55

Q

R

Relationship between the risk management principles, framework and process	12
Resources and processes	13
Right attitudes produce right actions	ii, 100
Risk Assessment Method	Contents, i, 10, 24
Risk management	1-3, 5, 11, 12, 15, 24, 25, 41
Road safety checklist	87
Role of safety team	31
Roof top	51, 54-56
Roof top design and provision	56
Rotary symmetry	76

S

Safe access	25, 47, 48, 50, 52, 53, 59, 61, 87, 88, 93, 94
Safe access for slope inspection and maintenance	93, 94
Safe design lifecycle	13
Safe Design Process and Risk & Solutions Register	i, 25
Safe Design Review from Concept Design to Pre-Construction Stages	i, 27
Safe maintenance access	47, 51, 53-55
Safety advisor	31, 33
Safety aspects in ground investigation works	93, 95
Safety Climate Index Surveys	6, 7
Safety considerations	47-66, 87-93, 98
Safety considerations for cleaning & maintenance workers and end users	Contents, 47-66
Safety considerations in civil engineering design and management	Contents, 87-92
Safety DNA	ii, 79

Safety First	ii, 42, 97, 100
Safety for building services provisions	57
Safety helmet with chin strap	8
Safety in building services installations	80
Safety in planning and design in developed countries	Contents, 10-29
Safety is everybody's business	1
Safety Leadership Award	ii
Safety measures in GI fieldworks	96
Safety of falsework	39
Safety platform for paths with services / pipes	56
Safety provision	55, 67
Safety & quality goes hand in hand	1
Safety through early system planning and structural design approach for demolition, foundation and building contracts	Contents, 67-79
Safety training programme for professional staff (& technical grade staff)	9
Safety training programme for resident site staff	9
Scoring scheme for health, safety & environmental risk assessment	34
Semi-precast slab	77
Site agent	33
Site specific	41
Site supervisors	79, 85
Six point safety focus	4, 32
Skilled workers	85
Slope	Contents, 8, 26, 45, 59, 87, 93-96
Special features	27, 66
Specialist	29, 33, 68
Steel fixing and concreting at heights	74
Subcontractor	7, 33, 36, 41, 42, 98
Superintendent	33
Swiss Cheese Method	31
System enhancements of HASAS version 1.4	7

T

Table of summary of safe design in various developed countries and Hong Kong	11
Tactile guide path	64, 66
Technical Guide	Contents, 47-66
Temporary or transient working environment	ii
Temporary works	Contents, iii, iv, 3-5, 28-39, 94, 97
Temporary work co-ordinator	33
Total safety management	1
Tower crane lifting	7,8

U	
UK CDM Regulations 2007 (1994)	14
Uneven ground or inconspicuous steps	65
Use of Building Information Modeling (BIM) for construction planning	Contents, 43-46
Use of 3D model for construction	37
Useful tools utilizing information technology	Contents, 4, 43-46
US research	10
US statistics	10
Utilities detection	87, 89

V	
Vertical greening	53
Virtual prototyping (4D Model)	38
Vision	iv, 1, 4

W	
Weather protection	54, 65
What is safe design	iv, 3
Who is “designer”	3, 5
Windows	60, 61
Window grille design	60, 61
Work Flow Risk Assessment (WFRA)	33, 36
Working platform	28, 39, 47, 52, 53, 75, 96

X
Y

Z	
ZERO harm	4, 30-33, 36, 38
ZERO incident	ii, 9, 30, 40, 98, 100
