

# Yard Waste Management

We co-operate closely with the Environmental Protection Department (EPD) on yard waste recycling. Trees felled for public housing projects are sorted and delivered to EPD's designated yard waste recycling centre, Y·PARK, for recycling. These yard waste will be recycled and transformed into useful materials such as wood boards, wood chips and sawdust etc. We also collect these recycled products such as wood chips from Y·PARK, as mulching for planting works.

We used recycled wood chips from Y·PARK for mulching at Dip Tsui Court.
