Hong Kong Flower Show 2024 “Well • Being and Happy Green Family” Landscape Design Honoured with Grand Award for Outstanding Exhibit (Landscape Display)

Actively participated in the annual Hong Kong Flower Show, the Housing Department (HD) has designed a garden titled “Well • Being and Happy Green Family”, echoing the theme of the Show this year – “Floral Joy Around Town”.

The landscape design

has proudly won the “Grand Award for Outstanding Exhibit (Landscape Display)”.

Upon entering the Garden through a blossoming “Well • Being Corridor”, visitors can see the archival images on the upcycled timber displayers along the way which depict the historical designs and evolution of public housing. The images showcase the contribution of the Housing Authority (HA) to building proper homes for all over the past 50 years.

Next to the Corridor stands the “HAppy Family” members, a set of fun characters symbolising neighbourliness. The hopscotch inside the Garden typical to estate playgrounds in the old days rekindles fond memories of many residents. Passing through the arches would make visitors feel like establishing a caring and happy community together with the “HAppy Family”.

On the left front side of the Garden stands the HA’s 3D logo, embellished with dazzling flowers in fancy patterns. The design denotes the “people-oriented”

value of the HA to engage the public in building happy, green homes for the well-being of the community.

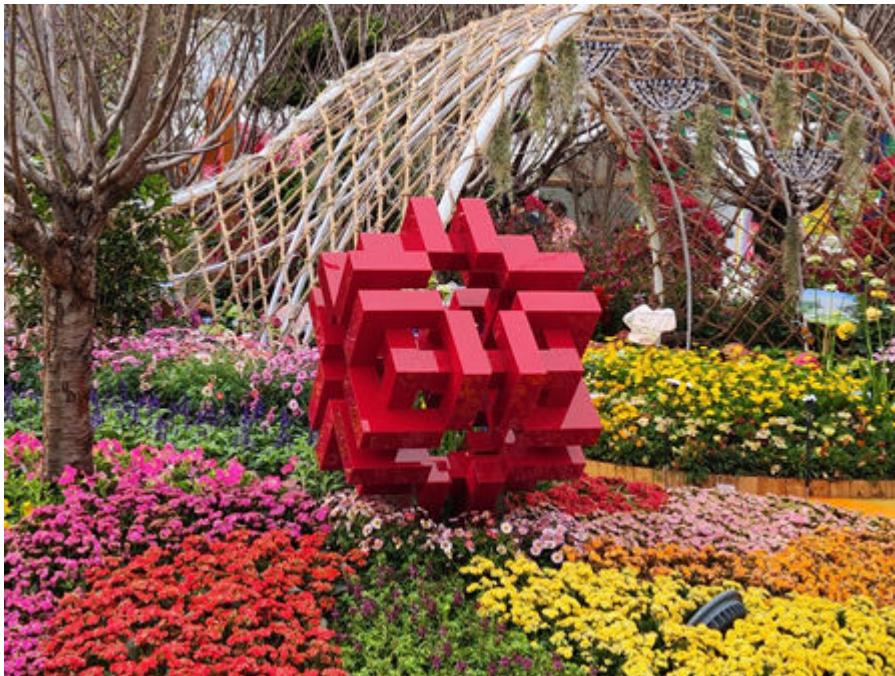

The HD's “Well • Being and Happy Green Family” Garden wins the Grand Award for Outstanding Exhibit (Landscape Display).
