

Safety & Health Alert No. 3/2023

The new publications from Construction Industry Council – CIC Beginner's Guides on Construction Digitalisation

Date : 10 February 2023
Ref. : HD2-7/SHU/108-30/14

The Construction Industry Council (CIC) has actively promoted the construction industry's digital transformation. In order to support the industry, especially Small and Medium Enterprises (SMEs) to enhance their capabilities, accelerate digitalisation and embrace new technologies, the CIC has published the following three "CIC Beginner's Guides on Construction Digitalisation",

1. CIC Beginner's Guide on Construction Digitalisation – Smart Site Digital Platform
2. CIC Beginner's Guide on Construction Digitalisation – Adoption of BIM in Small and Medium Enterprises
3. CIC Beginner's Guide on Construction Digitalisation – Adoption of Common Data Environment (CDE) for Information Management using BIM

The three "CIC Beginner's Guides on Construction Digitalisation" provides information on commonly required functionalities of a digital platform for managing construction projects, step-by-step instruction for SMEs to adopt Building Information Modelling (BIM), and practical advice on the general considerations when selecting a Common Data Environment (CDE) as an information management and collaboration tool for BIM.

For more information of the publication which is available in their website at (English version only)
