

Safety & Health Circular No. 10/2010

Safety of Working-at-Height and Renovation & Maintenance Works

Date: 28 June 2010

Our Ref. : HD(C)TS 4/49/26

Renovation and maintenance works encompass a wide range of jobs with various project sizes including decoration, redecoration, modification, upgrading and improvement work.

There have been numerous accidents in the past related to renovation and maintenance—with many of such cases related to working at height. The Labour Department has produced a DVD on Safety of Working-at-Height and Renovation & Maintenance Works. The DVD aims to raise the safety awareness of employers, employees, building management companies and owners' corporations to prevent accidents by implementing safety measures.

The DVD covers the following topics:

- Chapter 1: safety of working-at-height
- Chapter 2: safety of working on external walls of buildings
- Chapter 3: safety of renovation and maintenance works

If you have any enquiries, please contact the Occupational Safety and Health Branch of the Labour Department on 2559 2297, or e-mail: enquiry@labour.gov.hk
