

Here is the footage of "Site Safety Forum for Works Contracts and Property Services Contracts 2017" which was held on 6 July 2017.

MC is now delivering a closing remark.

Now, I am going to make a simple summary for the second part of the Forum.

As the contractor and stakeholder of the Estate Management Division, we endeavour to maintain the safety standard of housing estates management in recent years. We shall not succumb to the limitation of the estate environment and give up to improve the working environment. On the contrary, with impeccable fighting spirit, we shall keep on to.

improve the safety of the working environment continuously.

We shall accumulate the improvement from small to big.

We shall not be discouraged by the trivialities.

Any advices for the safety

shall not be only from top down

but also from all parties.

From frontline managers, supervisors,

even from the foremen to the workers, we all need to make the efforts.

I would like to speak on behalf of the Estate Management Division,

"thanks" for all of you from the bottom of my heart.

I hope everyone will continue to support the Estate Management Division.

Let's work closely and create

a safety working environment together.

In the meantime, on behalf of the two co-organisers, namely the Labour Department and the Hong Kong General Building Contractors Association, we highly recommend the workers to wear safety helmet on sites, and also buckle on the Y-type chin strap. Make sure that the safety helmet would not come off accidentally. Pay attention when working at height and safety measures must be implemented.

The seminar is coming to the end.

Again, on behalf of the Forum,

Thank you for the presence of our distinguished guests

and the participation of all of you.

Give yourself a little bit applause.

After the Forum in this afternoon,

I believe that all of you can remember the theme of today,

"Careful design can reduce accidents and ensure smooth and safe execution of works"

We have to implement all the safety measures on sites

to achieve the ultimate goal of "safe construction, zero incidents".

As a reminder,

all participants who have registered for getting attendance certificates,

please go to the respective registration counters outside

for receiving the certificates.

For environment protection,

please return the unused question sheets

to the registration counters.

Thank you very much and see you next year!
