箭咀指向上為正確

4) 安全帶尾繩  
直接扣上防墮扣

Here is the footage of

“Safety Forum 2019 for Works Contracts and Property Services Contracts”

which was held on 3 July 2019

by the Hong Kong Housing Authority

The Speakers are

Mr. Henry Cheung & Mr. Jack Fong

Senior Consultants of Occupational Safety and Health Council

Their topic is Practice of Safe Use of Personal Protective Equipment

Now, may we invite

Senior Consultants of OSHC

Mr. Henry Cheung and Mr. Jack Fong

to speak with us

Please come on stage with our workers

Thank you

This is my colleague Mr. Fong, I am Henry

also of OSHC

I am Jack Fong

This is not a demonstration

This part has come after lots of consideration

Safety audit led by Mr. Fong

and surprise safety inspection led by me

have observed some mindless behaviours of workers

We will speak on personal protection equipment

which is the last resort of defence

Some people have put them on

but may be done incorrectly, not properly

Today I am happy Mr. Mak and

his colleagues of Standard Supply Company Limited

are here for a case reflection

This is not a demonstration, there are 4 mistakes

We have 4 prizes, Mr. Fong will see who can answer correctly

Let us start from the top, look at the head  
The answer is in the head. There is a hand here  
The Y-type chin strap is not worn properly. A prize for you  
Now look at his safety harness, near the thigh  
Take a look. Any hand?  
Mr. Fong, any hands?  
At the back. What is the mistake?  
A live model, one of the clips is not fastened  
In fact, he has a clip  
When some workers take off the safety harness  
they take off everything  
like the way of wearing a jump suit  
There is a ring for the thigh  
but he forgets to put it on  
There is a Chinese saying tell us not to stay alone  
For example a worker work alone on the suspended work platform  
Others may not notice him  
Caring culture should be embodied now  
Other worker should show their concern  
remind their colleague to put on the thigh ring  
Zoom to the fall arrest clip  
Over there, friend who put up your hand please answer  
Fall arrest clip  
Pay attention to the direction of the clip  
The arrow is not pointing up  
It should point to the sky  
Otherwise it will slip downwards. Correct  
The 4th answer is also on the fall arrest clip  
Zoom to the lower part of the fall arrest clip  
At the end of the lanyard  
Any answer?

Good

The clip of the lanyard has to be fastened directly  
to the fall arrest clip, no extension

Correct

Fasten it directly to the clip

Perfect

Let us look at the proper way of wearing safety equipment

We have a PowerPoint to show

Mr. Mak, please come forward

There are 4 answers on the PowerPoint

Look at the picture

Remember to equip with the Y-type chin strap to protect your head  
so that the safety helmet will not fall off

There will still be protection even if it falls off

All ropes, chest rope, leg rings must be worn  
and fastened appropriately

The arrow of the fall arrest clip should point upwards  
and the lanyard of the safety harness  
should be fastened directly to the fall arrest clip

Thank you, everyone

Thank you Mr. Cheung and Mr. Fong  
and the 2 colleagues in the demonstration

The use of personal protection equipment  
are familiar to everyone

We have answered the 4 questions quickly

We may not have understood  
or misused the personal protective equipment

After the demonstration today  
we know the correct usage of the equipment  
that concerns our safety

Please share the information with your colleagues

We will reach the goal of  
bolstering caring culture for safety and health of our workers  
Thank you for watching
