消防系統簡介

安全行為推動

安全巡邏:巡邏大廈前伸展運動

安全裝備/措施 防止通渠水溢出器:

應用地方

- 可應用於日常通渠工程
- · 防止通渠水因與水份產生化學反應而四濺,繼而灼傷皮膚及眼睛

使用方法

安全裝備/措施:

手提式水氣掣

梯台、功夫櫈及流動工作台

安全裝備/措施 四平八穩警報器:

當升降台或棚架傾斜時,發出警報 提示工作人員,直至將升降台或棚 架回復水平

亦提醒工作人員避免 過份伸出工作台範圍 引致傾斜

安全裝備/措施: 吊船高空工作

參照天文台天氣警告,當季候風警告懸掛時停工

使用風速計量度現場的風速,監察工作前及期間 風速

當現場風速超出風速上限時停工

Here is the footage of

"Safety Forum 2019 for Works Contracts and Property Services Contracts"

which was held on 3 July 2019

by the Hong Kong Housing Authority

The Speaker is

Mr. Lo Kwok Keung

Assistant Chief Manager of Royal Elite Service Company Limited

His topic is Sharing of

Best Property Safety Management Award by the Gold Award Winner

Next, we have another competition winner to speak to us

Next, we have another competition winner to speak to us

Let us invite the gold award winner

of the Occupational Safety and Health Council 2018-2019

Property Management Services Competition

whom will share his experience with us

Assistant Chief Manager of Royal Elite Service Company Limited

Mr. Lo Kwok Keung, please

Friends of the construction and property management services industries

Greetings

I am from Royal Elite Service Company Limited, I am Stanley

We mainly manage new residential projects of Sun Hung Kai Properties

It is our honour to manage Manhattan Hill

In 2018-2019

we were awarded OSHC's Best Property Management Gold Prize

There are about 1100 units in Manhattan Hill and a club house

As for property management services

what have we done to win this award?

We have a little to share with you

Mainly, our housing estate adopts some accreditation system

including ISO and a previous version of 18001

and clients management system

We also have the safe and healthy estate accreditation

kitchen accreditation etc.

Our company has set many safety

guidelines for colleagues

We have a safety committee

We review our work every quarter

The industry has a lot of safety policies and safety issues

During the company's quarterly reviews

our safety committee will share information with colleagues

We carry out safety measures, we have rehearsals

In a while, you will see the demonstration of transporting

proper use of AED machines, fire extinguishers

and personal protection equipment etc.

are demonstrated to our colleagues

and hope they will perform their daily duties

with better safety and effectiveness

The company has many procedures

that colleagues can follow

such as work procedures, cutting and lifting

In providing daily services

even the use of screens in the office

there are procedures to follow

Everyone can abide by the guidelines to operate in safety

This is the general rehearsal

The AED machine we mentioned

fire extinguishers and use of elevating working platform

are all demonstrated to colleagues regularly

and provide safety guidelines

This is a clip, video please

Man, do the patrolling?

Yes

Come here to watch the OSH video

Do some stretch exercise before patrolling

OK

Let us do these 2 exercises

After the stretch exercise

Let us go patrolling with the phone

Patrolling with care

Hold the hand rail always

In our industry, we know patrolling

and frontline accounted for over 80% of our frontline staff

They do a lot of patrolling every day

Tripping and falling is an issue

Before carry out patrolling, we remind them via mobile app

Before carry out patrolling, we remind them via mobile app

which is part of the patrol system

to do adequate stretching exercise and walk carefully

to do adequate stretching exercise and walk carefully

That will reduce the chance of falling or tripping

On the other hand, in our daily operation

there may be drain clogging

Our staff have strong safety awareness

They take the initiative to do research

on a device to prevent clog remover from splashing

Cover the drain and then

the clog remover will not splash out and injure colleagues

Let us see another clip

In addition, we have the same sharing as many other guests

Regarding work at height

we also provide the 3 safety bubbies

step platform, hop-up platform etc. are provided

instead of ladders

Ladders are for up and down movements only

We also use elevating working platforms

for maintenance or cleaning at height

In positioning an elevating working platform

make sure it is steady and balanced

We have a device for this purpose

A worker is equipped with the device before using a platform

Any imbalance will alert the device to ring

The worker will then get off the platform

adjust the balance before getting on platform again

Workers are safe when they work on platforms

Inside the building, there are

many glass curtain walls that need cleaning

Before cleaning

we refer to wind speed information from the weather observatory

We also use a real time anemometer

to measure the wind speed at the property

Whether it is higher than standard

If it is, we will stop all work immediately

We also have many patrol record forms

to raise everyone's safety awareness

Most importantly is safety inspection

Our colleagues do inspection work

We have different districts

and cross-district inspection is carried out

to ensure we meet all occupational safety requirements

Today's sharing ends here

Thank you

Let us give Mr. Lo a round of applause. Please be seated

We understand that everything deserves our full attention

This will keep our work environment safe

Thank you for watching
