

Here is the footage from the  
Hong Kong Housing Authority  
"Site Safety Seminar for Capital Works New Works Contracts" which was held on 27  
April 2017.

The speaker is

Mr. Jack Fong, Senior Consultant of Occupational Safety and Health Council.

His presentation topic is

Findings in Q4 of 2016 and Q1 of 2017,

Housing Authority Lift and Escalator Nominated Sub-contracts

Safety Auditing System (HALENSAS) Version 1.0

Then share the results of Housing Authority Lift and Escalator  
Nominated Sub-contracts Safety Auditing System (HALENSAS).

The working platforms are generally equipped with guardrails and toe boards.

Independent safety ropes also meet standards.

Suitable working platforms are used.

Guided gondolas are adequately protected.

In the machine room, the floor openings and the moving parts  
are properly protected.

The hammers are properly protected.

For electricity, the wires have been hung at high level.

Suitable hand straps are provided for portable tools. This is the end of my sharing,  
thank you.

Thank You For Watching.
