

Latest Progress of
Housing Authority
Occupational Injury and Disease Surveillance System
(HAOIDSS)

12 April 2018

Background

- A web-based management information system for Housing Authority (HA) (<https://sms.oshc.hk/haoidss/>)
- Objectives
 1. To report incident and disease cases happened on construction sites
 2. To assist contractors in completion of administrative forms for notification of accidents and incidents to HA
 3. To provide users alert when an action level / control limit is exceeded
 4. To provide HA users the capability to generate statistics for injury surveillance

Summary of Cases and Accounts

As at 2018.03.31

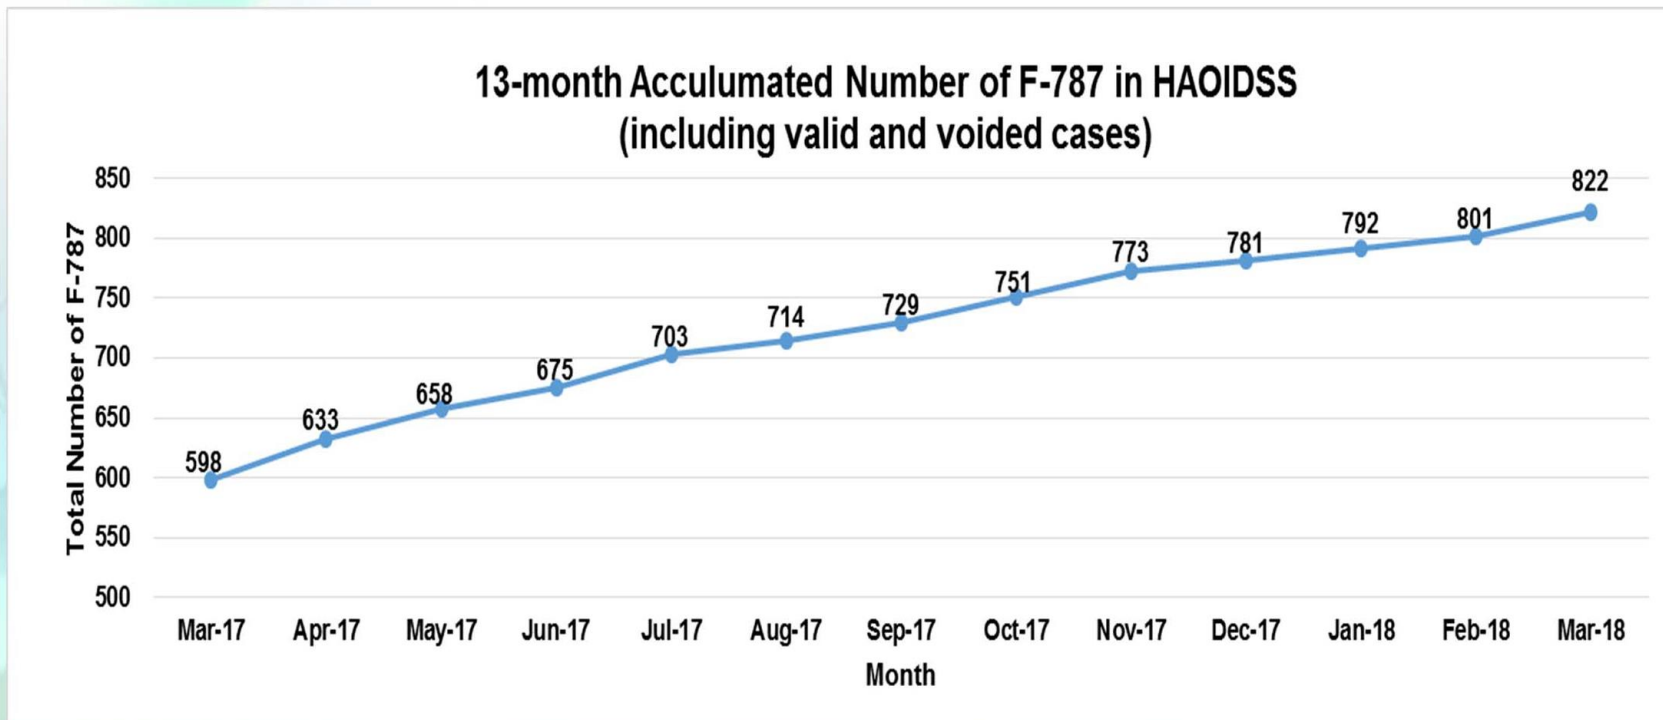

Item	Number (Active accounts / cases)
F-787	822
<i>Creating</i>	<i>20</i>
<i>Waiting for review</i>	<i>39</i>
<i>Signed by CM</i>	<i>730</i>
<i>Rejected</i>	<i>13</i>
<i>Voided (Inactive)</i>	<i>20</i>
HA User	8
Contract	160
Contractor	261*
Contract Manager (CM)	85
Use of Root Causes Analysis	5

** Some contracts have more than one contractor's account for reporting*

Accumulated F-787 Cases

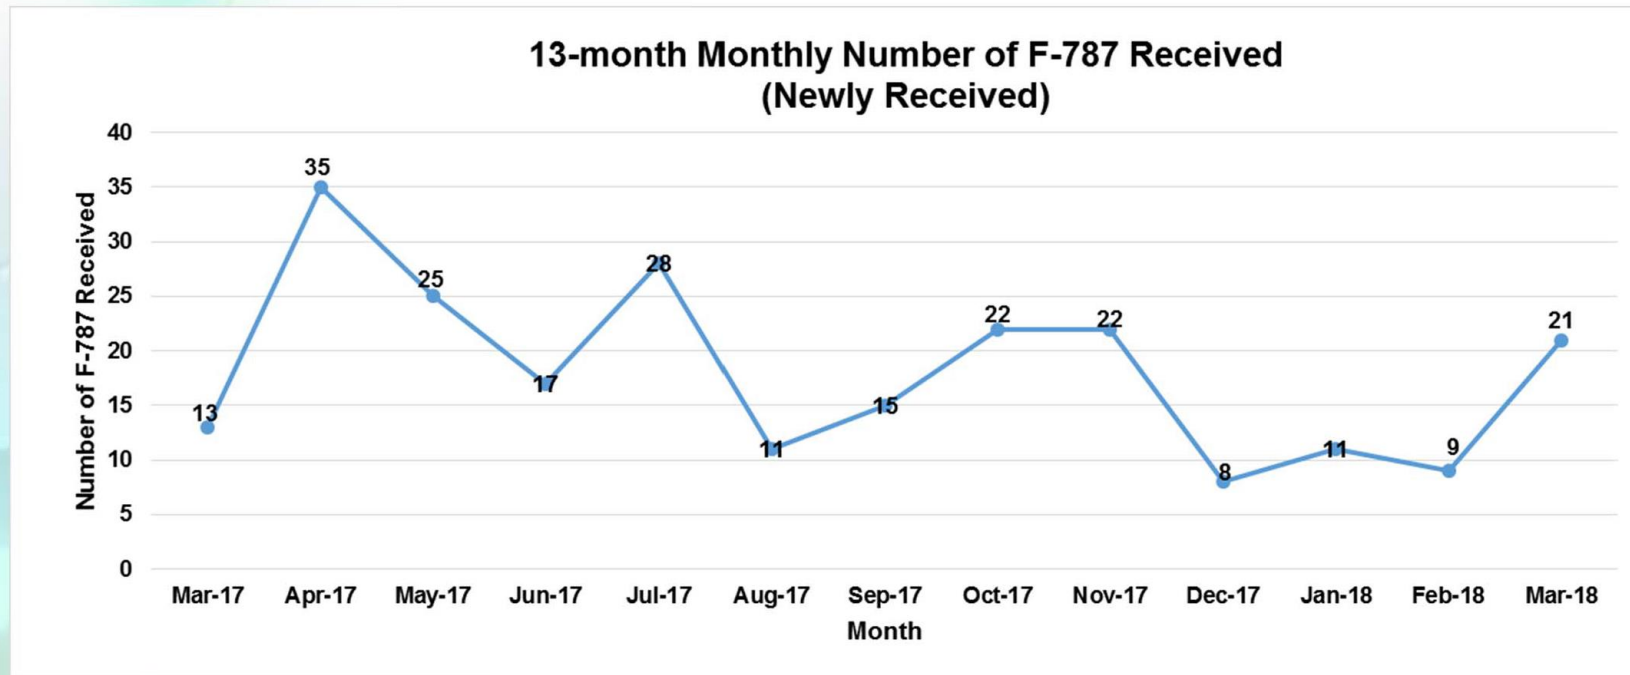

From Mar 2017 – Mar 2018

Monthly F-787 Input

From Mar 2017 – Mar 2018

Helpline Enquiries

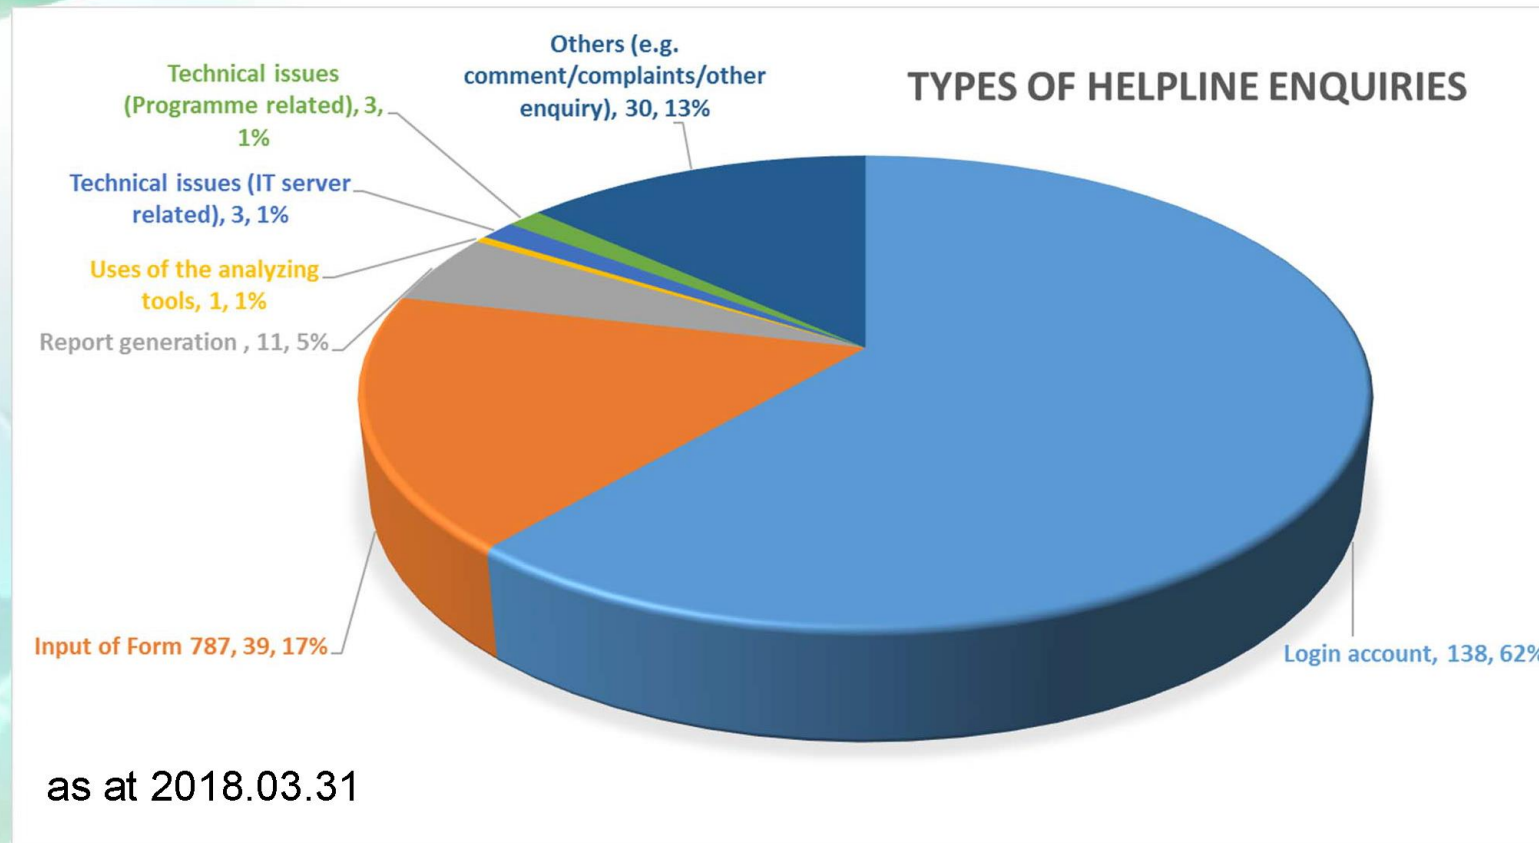

225 enquiries were received in total (as at 2018.03.31)

- 129 received via hotline
- 96 received via email

	Types of Helpline Enquiries	Phone	Email	Total
1	Login account	68	70	138

Here is the footage of
Site Safety Seminar for Capital Works New Works Contracts
of Housing Authority which was held on 12 April 2018
The speaker is Senior Consultant of
Occupational Safety and Health Council
Mr. Henry Cheung
His presentation topic is
The Latest Progress of the Housing Authority
Occupational Injury & Disease Surveillance System (HAOIDSS)

(00:28)

This is the latest development of the system
after official launch years ago
The aim of this system is to facilitate
the accident / incident reporting process
for different stakeholders
utilizing past incident records to prevent accidents
Until March 31, 822 cases of Form DCMP-787 have been stored
Vast data was available for further analysis

The number of cases increased every month
There were more than 800 cases until the end of March
New cases continuously increased
There were 9 and 21 new cases recorded in recent months
When you encountered any difficulties
please call our hotline
We helped contractors or other users to solve problems
Majority of the queries were about login issues and input problems
They constituted the majority of the enquiries
no matter by telephone enquiry or email enquiry
We may refer to this chart
The sum of these two was more than 50% of the enquiries
In fact, it would not be difficult at all to solve these problems

Login enquiries were mainly due to forgotten passwords
Login account locked by the system
or handling personnel changes
there were some queries in this aspect
Difficulties were encountered with regard to input problems
such as how to correct the wrong input data
this can be solved but required our data patching
Users could not cancel
the submitted Form DCMP-F787 themselves
With appropriate reason, we would deal with it
That was the summary of enquiries

Coming improvement would be due
to the updating of Form 2
there would be changes
on the Supplementary Information Sheet
for the information of the construction site
The electronic Form 2 will also be changed
to add back the missing part
We will modify Form 2 and the corresponding location
of the additional information of the accident
on the Supplementary Information Sheet
In accordance with the latest issue
we will follow up the changes as soon as possible
You can call our hotline at 31065600
or email us when you have any enquiries
This is the end of my sharing, Thank you
Thank you for watching
