

Here is the footage of

“Site Safety Seminar for Capital Works New Works Contracts”

which was held on 30 October 2019

by the Hong Kong Housing Authority

The Speaker is

Mr. Lam King Chi, Chief Architect/7 of the Housing Department

He is now delivering a Welcoming address

We would like to invite Chief Architect (7) Mr. Lam King Chi

to deliver the welcoming speech, thank you

Good afternoon

Guests, stakeholders and colleagues

Welcome to the Site Safety Seminar for Works Contracts

Thanks to our speakers today

They will share with us information regarding site safety

We often talk about innovative technologies nowadays

How can innovative technologies enhance site safety and health ?

It has become a hot topic in the construction industry

In order to better understand related developments in the Asia area

early this year, two colleagues from the Housing Department

Senior Architect Ms. Yu Suk Wa, and

Senior Structural Engineer Mr. Chang Kar Seng

joined a study tour to Korea organised by the

Occupational Safety and Health Council (OSHC)

The Benchmarking Study on Construction Occupational Safety

and Health Innovations Technologies in Korea

Hope their sharings can bring us plenty of insights

Welding and flame cutting in Hong Kong

often involve gas cylinders

including acetylene cylinder and oxygen cylinder

The equipment must be checked before use

Are the gas pipes in order? But is that enough?

Today, we are very happy to have invited

Mr. Cedric Chung of Linde HKO Limited

He will share with us how to handle gas cylinders safely

As usual, our partner, Mr. Jack Fong and Mr. Henry Cheung

Senior Consultants of OSHC

Senior Consultants of OSHC

They will provide an analysis of the safety audits and

surprise safety inspection reports in the

2nd and 3rd quarters of 2019

This is the time of reporting the performance of contractors

The results would tell us whether past effort was sufficient

To step up effort if there is room for improvement

Learn from one another's good works

All of you are our important partners

We work together to enhance safety

Let us walk the extra mile for site safety

Before the seminar ends

Ms. Wan Chung Yan, our Manager of Safety & Health

will brief on the reporting system of incidents and accidents

to help us submit more comprehensive information

Please take the safety message today back to your site

You can visit the site safety website of Housing Authority

or share the information and recordings today at your site

to let the message of site safety reach out to many

Thank you

Thank you for watching
