Summary of Good Practices 良好作業摘要

- Good practices were observed in the provision of proper access equipment; provision of sufficient material skips for material storage; display of real time working load for tower crane; and provision of charging station for cordless hand-held tools.
- 良好作業：提供合適工作通道；提供足夠物料斗儲放物料；為天秤提供實時負重操作資料；及在地盤提供充電站為無線電手工具充電。

2020 Q1

3

提供合適工作通道。

Provision of proper access equipment.

2019 Q4

4

提供足夠物料斗儲放物料。

Provision of sufficient material skips for material storage.

Title: Site Safety Seminar for Capital Works New Works Contracts

Super Site Safety Seminar for
Capital Works New Works Contracts
16 July 2020

VO: Here is the footage from
Site Safety Seminar for Capital Works New Works Contracts
which was held on 16 July 2020

Super Senior Consultant of Occupational Safety and Health Council
Mr. Henry CHEUNG
His presentation topic is
“Surprise Safety Inspection Programme (SSIP)
– Findings in Quarter 4 of 2019 & Quarter 1 of 2020”

VO: The speaker is Mr. Henry CHEUNG
Senior Consultant of Occupational Safety and Health Council
His presentation topic is
Surprise Safety Inspection Programme (SSIP)
Findings in Quarter 4 of 2019 & Quarter 1 of 2020

Mr. Cheung: Hello, everyone!
I would share the findings of the surprise safe inspections
in Q4 of 2019 and Q1 of 2020
We should give recognition to the good practices
and also learn from the bad practices
It is 2020 this year
The median score for Q4 2019 was 91 points
It was 93 points for Q1 2020
Let us look at some positive examples first
For this working floor
planks were laid to allow safe access
This was commendable
There were mid and top guard-rails with good planks
These were quite uncommon, so this was really commendable
Material skips were neatly organised
without materials being too high or overflowing
For organised waste dumping, material skips would not overflow
This was a relatively new way of working
The tower crane gave immediate, real-time feedback on the spot
using the traffic light colour system to show
if the weight had exceeded safety guidelines
It was very easy to understand
For new contracts, cordless portable electric tools were used
They were charged at a spot sheltered from wind and rain
This was a good example

That is all for my sharing today
Thank you

VO: Thank You For Watching
