

Seminar20210427A(Welcome) EN subtitle

Here is the footage of “Site Safety Seminar for Capital Works New Works Contracts”

by the Hong Kong Housing Authority

which was held on 27 April 2021

The speaker is Mr. Leung Hung Wai

Assistant Director (Development & Procurement) of the Housing Department

He will deliver a welcoming address

Guests, fellows and colleagues

Thank you for coming to this Site Safety Seminar

for Capital Works New Works Contracts (Webinar)

We are particularly grateful for the guests who show up today

in the midst of the pandemic, for supporting us and

sharing the latest information on site safety

You may be familiar with Hong Kong as a smart city

I assume you may have read the news

on smart lamppost and smart software

I wonder if you have ever heard of “Smart Site”

In fact, “Smart Site” is about enhancing site safety

by introducing innovative technologies in recent years

How exactly does it work and how effective is it?

It is our pleasure to have Mr. Lee Man Yiu

Assistant Secretary (Works Policies 5) 5

to introduce “Smart Site for Safety” to us

The Housing Department has always encouraged contractors

to implement innovative safety practices on site

through its Safety Auditing System and Pay for Safety Scheme

We have invited two new works contractors of Housing Department today

to share with us their practices and experience on the design and

application of innovative technologies

They are Mr John Woo from Shui On Building Contractors Ltd and

Mr. Sung Ho Hong and Mr. Ng Kai Yiu

of Sun Fook Kong Construction Limited

We have also invited Mr Cheng Yiu Man

of Hip Hing Engineering Company Limited

to share with us the key highlights of footbridge erection

You may think that footbridge erection is not a large-scale construction

but since the majority of these erection works

involve public areas and roads

construction safety cannot be neglected

The Housing Authority cares a lot about site safety

We join hands with Occupational Safety & Health Council every season

to conduct safety audit and surprise safety inspection

to find out safety loopholes, and more importantly

we can communicate with front-line workers directly

to enhance their site safety awareness

Mr. Jack Fong and Mr. Steve Hui, both Senior Consultants

of Occupational Safety & Health Council

will analyse the findings of the safety audits and Surprise Safety Inspection Programme

in the 4th Quarter of 2020 and 1st Quarter of 2021 for us later

You can also browse the webpage of the Housing Authority on site safety anytime

and help spreading the safety message you learnt today on site

Last but not least, I hope all of you stay healthy and

get vaccinated as soon as possible in the midst of the pandemic

This is also what the Central Government wishes from all of us

Stay safe and bear site safety in mind, thank you
