This is a clip from the 12 July 2023 recording of the

Hong Kong Housing Authority

“Site Safety Seminar for Capital Works New Works Contracts”

The speaker on stage is Mr. Tony Chan

Chief Structural Engineer/2

He will give the welcoming address

Mr. Tony Chan :

Good afternoon, everyone

Welcome to the “Site Safety Seminar for

New Works Capital Works Contracts”

We have invited new works colleagues from

Housing Department

Especially those who have joined us recently

We hope the seminar will help enhance your understanding

on safety and health measures of Housing Authority

as well as contract requirements for new capital works

hence improve safety awareness

When it comes to enhancing safety and health at works sites

Cynthia Lee, Manager of Safety and Health (2) will brief you on the

key points of safety and health measures of new works contracts

In recent years, Housing Authority endeavours to promote innovative technologies

We encourage contractors to enhance site safety management efficiency

with the help of innovative safety measures

Today, Leo Lee, our Senior Clerk of Works

(Surprise Safety Inspection Programme) will brief you on

safety innovation requirements, to help you understand

the application of innovative technologies

within the works sites of Housing Authority

We always emphasize greatly on site safety

Each quarter, we join hands with the Occupational Safety and Health Council

to conduct “safety audits” and “surprise safety inspections”

at new works sites of Housing Authority

Aside from looking for shortcomings

we would like to communicate directly with frontline staff

and enhance their safety awareness

Later on, James Tam, acting Clerk of Works / Development and Construction (15)

and Bill Chan, Clerk of works / Safety and Health

will present some good practices

found during safety audits and surprise safety inspections

One single accident is far too many

We should learn our lessons from past accidents

and prevent similar accidents from happening in future

I extend my gratitude to our speakers today

for sharing information relating to site safety with us

Please bring the safety messages back to your works sites

The seminar will be recorded and uploaded onto the Internet

so that you could revisit it or share it with your colleagues

Finally, Housing Authority has a site safety website

where we regularly update safety information

Please go to take a look when you have time

so as to keep yourself up-to-date with safety information

Let us all work together to ensure site safety

Thank you
