觸覺引路帶和斜道 連接有蓋行人通道，住宅大樓和停車場	 The photographs show three different views of tactile paving (yellow raised strips) installed in a building corridor. The top-left photo shows a straight section of the corridor with a metal handrail on the left. The top-right photo shows a corner where the tactile paving turns 90 degrees to the right. The bottom photo shows a wider view of the corridor with a ramp section and a metal handrail on the left. The walls are made of grey and blue tiles, and the floor is made of grey stone tiles.
